Idea on Phase
Define the Problem Statements

Date	04 March 2026
Team ID	Sourav kadam, Abhay Nayakwdi, Prajwal Kotgonda, Rohan Pawar.
Project Name	Heart Disease analysis
Maximum Marks	2 Marks

Customer Problem Statement:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	a high-risk pa ent	understand my personal risk factors and how to lower them	the medical jargon in my test results is overwhelming	I lack a simple, visual way to see how my lifestyle (diet, exercise) affects my heart health	anxious and powerless about my long-term health
PS-2	a cardiologist / clinician	iden fy which pa ents need urgent interven on or screening	need urgent interven on or screeningI have to manually scan through hundreds of sta c EHR records	there is no automated tool to priori ze pa ents based on predic ve risk scores	overwhelmed and worried about missing a cri cal diagnosis

Heart Disease Analysis Project Problem Statements

I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 a heart-healthy patient (preventative focus)	PS-1 understand my personal risk factors for heart disease and how to lower them	PS-1 the information from doctors, diet, and fitness apps is disjointed and complex	PS-1 there is no centralized visual dashboard to see combined health trends and risks	PS-1 anxious and confused about which actions are are most critical for my health
PS-2 a diagnosed patient or clinician	PS-2 monitor my condition or a patient's progress using various metrics (e.g., blood pressure, ECG)	PS-2 the data is spread across different platforms, often in text reports or static charts	PS-2 existing clinical tools don't synthesize or visually display patient history over time clearly	PS-2 limited and concerned about missing a significant health change or trend
